

SYBRIN
ACADEMY

Business Process Management (BPM) Bootcamp

5-Day Course

Overview

Sybrin created a unique BPM Bootcamp using BPMN 2.0 and other technology, based on our industry experience as BPM specialist, which covers both technical and non-technical aspects. Our Bootcamp consist of group activities and Use Case work (theory and practical), as well as continuous progress assessments.

What is BPM?

Business Process Management (BPM) is a holistic management approach to aligning an organisation's business processes with the wants and needs of clients.

- » BPM is a management philosophy
- » It focusses the organisation on teamwork, enterprise performance and satisfying the end customer
- » BPM requires a methodology as well as a collection of tools that enable enterprises to specify, implement, execute and manage business processes.

Who should attend?

- » Process Engineers
- » BPM Business Analyst
- » BPM Developers
- » BPM Designers

BPM Bootcamp Value

- » Rapid team upskilling using BPM best practices.
- » Expose and learning from our industry experience as BPM Specialist
